pestop® services

COMPANY'S LONG TERM MISSION

A firm registered under the register of firm and are manage by the qualified agricultural graduates from GAU, Anand with insect pest management specialization and having experience in pest control industries as well as pesticides marketing.

Our inspection and "experience to work with Pharmaceuticals and Food industries" revealed that the following measures should take with complete packages of specialized treatments on regular annual basis.

The company is pioneer in the field of professional pest control services using much of naturally occurring pesticides such as DELTAMETHRIN, OR CYFLUTHRIN 10 %, LAMDA CYHLOTHRIN OR PYRETHRUM 2% EXT for "general pest control treatment" and BROMADIOLONE 0.005 % RB for "Rodent control treatment", because these field rats are only responsible for causing damages to the valuable equipments, spreading contageneous diseases and made the filthy unhygienic conditions by their urination.

This pesticides having least health hazards but better insecticidal activity and the biodegradable in nature.

Effective pest control services always play a vital role in maintaining good house keeping in FOOD FACTORIES, PHARMACEUTICAL INDUSTRIES, and HOSPITALS AND HOTELS.

pestop® services

OPPORTUNITIES, GOAL & ACHIEVEMENT

Identify problems and opportunities.

Pest management can be a major factor when it comes to compliance audits like USFDA, MHRA, KFDA, cGMP, HACCP etc so it's important to proactively help prevent pests by implementing an Integrated Pest Management (IPM) program. We prefer an ongoing cycle of three activities

1)assess, 2)implement and 3) Monitor

to help prevent pest infestations before they start. By following the latest best practices in IPM, we help you create a cleaner, safer and healthier production environment.

Goal : To gain customer confidence by providing best techno commercial solutions

Achievements:
Commercial Area : To works with more than 100 corporate companies
Residential Area : Provide services satisfy more than 8000 homes

pestop® services

pestop® services

RAT - RODENT CONTROL

This calls for a thorough knowledge of rodent behavior, rodenticide and their proper use. It is important to know that any one single approach will not help in arresting the problems. The following measures will adopted solely, simultaneously or collectively.

1) Baiting Method: - (Outside Area) This is calls for the use of a relatively safe and highly effective single dose anticoagulant rodenticides carried only with the placement of supplied bait stations at out side area of the premises where the rodent population would be breed and grow.

2) Sticky Trapping Method: - (Inside Area): This treat. would be carried out inside the premises by using traps like sticky Glue traps or cages at various places as and when requires.

Frequency :- Weekly

pestop® services

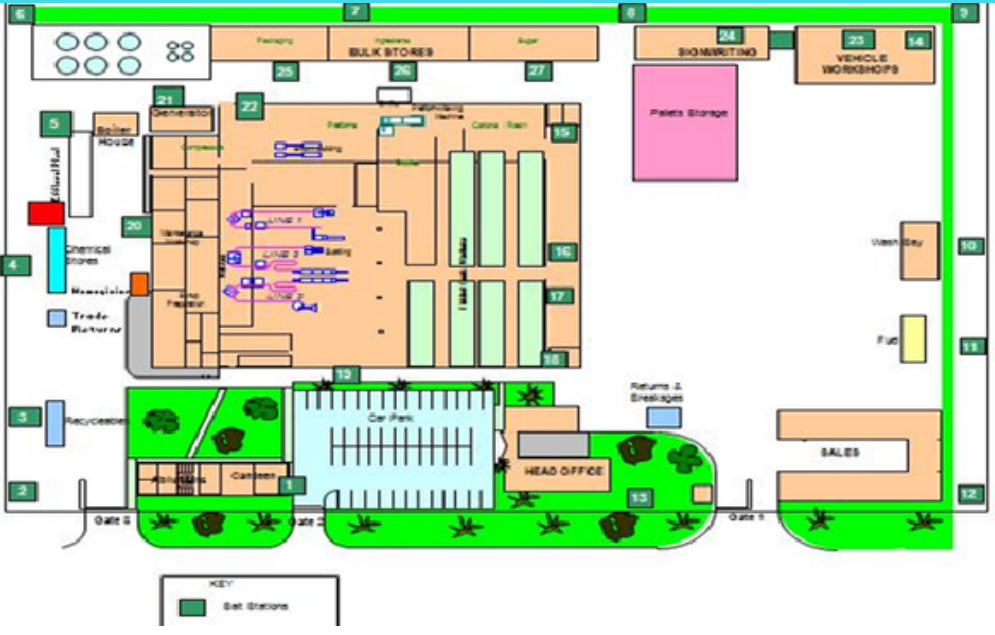

LABELING & CLEANING OF BAITS & GLUE STATIONS MATCH WITH DRAWINGS

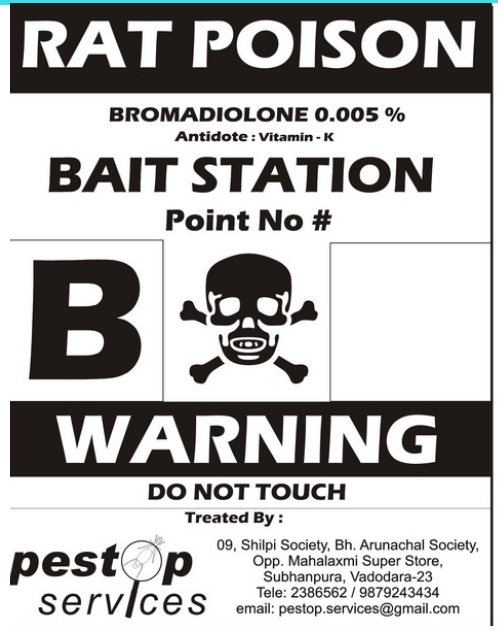

pestop services

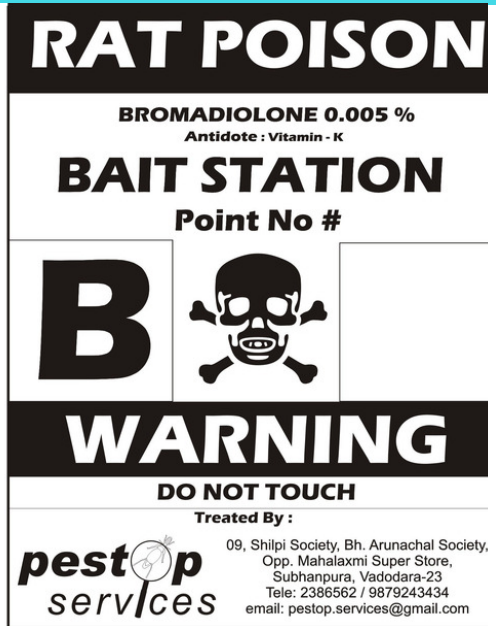

Maintain the schematic drawings of the placement of Rodent bait stations & glue stations as per the physical placements, so that any one can identify the problems easily & improve the scope of work
